INSTITUTE VISION

To be a centre of excellence for development and dissemination of knowledge in Applied Sciences, Technology, Engineering and Management for the Nation and beyond.

INSTITUTE MISSION

We are committed to value based Education, Research and Consultancy in Engineering and Management and to bring out technically competent, ethically strong and quality professionals to keep our Nation ahead in the competitive knowledge intensive world.

QUALITY POLICY

We are committed to

- Provide value based quality education for the development of students as competent and responsible citizens.
- Contribute to the nation and beyond through research and development
- Continuously improve our services

DEPARTMENT OF INFORMATION TECHNOLOGY

VISION

To be a centre of excellence for development and dissemination of knowledge in Information Technology for the Nation and beyond.

MISSION

Department of Information Technology is committed to:

- | | |
|------|--|
| MS1: | To transform the students into innovative, competent and high quality IT professionals to meet the growing global challenges |
| MS2: | To impart value-based IT education to the students and enrich their knowledge |
| MS3: | To endeavour for continuous upgradation of technical expertise of students to cater to the needs of the society |
| MS4: | To achieve an effective interaction with industry for mutual benefits |

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

Post Graduates of Information Technology will

- | | |
|-------|--|
| PEO1: | Work on need based research in different domains relevant to Information Technology and carry out research projects of national and social relevance |
| PEO2: | Provide problem solving capability through IT tools and techniques with adequate hands on experience to meet industry/ societal needs |
| PEO3: | Create, apply and disseminate cognitive ideas related to IT field and advance in their profession |

**MAPPING OF MISSION STATEMENTS (MS) WITH PEOs**

1 – Slight, 2 – Moderate, 3 – Substantial

| PROGRAM OUTCOMES (POs) | |
|--|--|
| M.Tech(Information Technology) Graduates will be able to: | |
| PO1: | Carry out research /investigation and development work independently to solve real world problems in the field of information technology |
| PO2: | Write and present a substantial technical report on their own research findings |
| PO3: | Apply knowledge of mathematics, science, and computer science/technology to analyze, evaluate, model and integrate technologies for the upcoming issues in the field of Information and Communication Technologies |
| PO4: | Transfer technology efficiently on engineering needs within engineering community and with society at large, by being able to comprehend and develop presentations and software tools |
| PO5: | Identify contemporary issues in providing technology solutions for sustainable development considering impact on economic, social, political, and global issues and thereby contribute to the welfare of the society |
| PO6: | Demonstrate independent learning and erudition by adopting research mission |

KONGU ENGINEERING COLLEGE, PERUNDURAI, ERODE – 638060

(An Autonomous Institution Affiliated to Anna University)

REGULATIONS 2020

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

MASTER OF ENGINEERING (ME) / MASTER OF TECHNOLOGY (MTech) DEGREE PROGRAMMES

These regulations are applicable to all candidates admitted into ME/MTech Degree programmes from the academic year 2020 – 2021 onwards.

1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. “University” means ANNA UNIVERSITY, Chennai.
- ii. “College” means KONGU ENGINEERING COLLEGE.
- iii. “Programme” means Master of Engineering (ME) / Master of Technology (MTech) Degree programme
- iv. “Branch” means specialization or discipline of ME/MTech Degree programme, like Construction Engineering and Management, Information Technology, etc.
- v. “Course” means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Engineering Design Methodology, Machine Learning Techniques, etc.
- vi. “Credit” means a numerical value allocated to each course to describe the candidate’s workload required per week.
- vii. “Grade” means the letter grade assigned to each course based on the marks range specified.
- viii. “Grade point” means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- ix. “Principal” means Chairman, Academic Council of the College.
- x. “Controller of Examinations” means authorized person who is responsible for all examination related activities of the College.

xi. “Head of the Department” means Head of the Department concerned of the College.

2. PROGRAMMES AND BRANCHES OF STUDY

The following programmes and branches of study approved by Anna University, Chennai and All India Council for Technical Education, New Delhi are offered by the College.

| Programme | Branch |
|-----------|---|
| ME | Construction Engineering and Management |
| | Structural Engineering |
| | Engineering Design |
| | Mechatronics Engineering |
| | VLSI Design |
| | Embedded Systems |
| | Power Electronics and Drives |
| | Control and Instrumentation Engineering |
| | Computer Science and Engineering |
| MTech | Information Technology |
| | Chemical Engineering |
| | Food Technology |

3. ADMISSION REQUIREMENTS

Candidates seeking admission to the first semester of the ME/MTech Degree programme shall be required to have passed an appropriate qualifying Degree Examination of Anna University or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto, subject to amendments as may be made by the Anna University, Chennai from time to time. The candidates shall also be required to satisfy all other conditions of admission prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time.

4. STRUCTURE OF PROGRAMMES

4.1 Categorisation of Courses

The ME / MTech programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester and project work, internship, etc that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Foundation Courses (FC)
- ii. Professional Core (PC) Courses
- iii. Professional Elective (PE) Courses
- iv. Open Elective (OE) Courses
- v. Employability Enhancement Courses (EC) like Innovative Project, Internship cum Project work in Industry or elsewhere, Project Work

4.2 Credit Assignment

Each course is assigned certain number of credits as follows:

| Contact period per week | Credits |
|---------------------------------|---------|
| 1 Lecture / Tutorial Period | 1 |
| 2 Practical Periods | 1 |
| 2 Project Work Periods | 1 |
| 40 Training /Internship Periods | 1 |

The minimum number of credits to complete the ME/MTech programme is 72.

4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like innovative project, internship cum project work and project work during the programme to gain/exhibit the knowledge/skills.

4.3.1 Innovative Project

A candidate shall earn two credits by successfully completing the project by using his/her innovations in second semester during his/her programme.

4.3.2 Internship cum Project Work

The curriculum enables a candidate to go for full time internship during the third semester and can earn credits through it for his/her academics vide clause 7.6 and clause 7.12. Such candidate shall earn the minimum number of credits as mentioned in the third semester of the curriculum other than internship by either fast track mode or through approved courses in online mode or by self study mode. Such candidate can earn the number of credits for the internship same as that of Project Work in the third semester. Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

4.3.4 Project Work

A candidate shall earn nine credits by successfully completing the project work in fourth semester during the programme inside the campus or in industries.

4.4 Value Added Courses / Online Courses / Self Study Courses

The candidates may optionally undergo Value Added Courses / Online Courses / Self Study Courses as elective courses.

4.4.1 Value Added Courses: Value Added courses each with One / Two credits shall be offered by the college with the prior approval from respective Board of Studies. A candidate can earn a maximum of three credits through value added courses during the entire duration of the programme.

4.4.2 Online Courses: Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by respective Board of Studies.

4.4.3 Self Study Courses: The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the respective Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty. Self study course is limited to one per semester.

4.4.4 The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance (up to second semester).

4.4.5 A candidate can earn a maximum of 15 credits through all value added courses, online courses and self study courses.

4.5 Flexibility to Add or Drop Courses

4.5.1 A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.

4.5.2 From the second to fourth semesters the candidates have the option of registering for additional elective/Honors courses or dropping of already registered additional elective/Honors courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates. Total number of credits of such courses during the entire programme of study cannot exceed six.

4.6 Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.

4.7 The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.

4.8 The medium of instruction, examinations and project report shall be English.

5. DURATION OF THE PROGRAMME

5.1 A candidate is normally expected to complete the ME / MTech Degree programme in 4 consecutive semesters (2 Years), but in any case not more than 8 semesters (4 Years).

5.2 Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.

5.3 The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

6. COURSE REGISTRATION FOR THE EXAMINATION

6.1 Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.

6.2 The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8), earn continuous assessment marks. This will be considered as an attempt for the purpose of classification.

6.3 If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.

7. ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

7.1 The ME/MTech programmes consist of Theory Courses, Theory cum Practical courses, Practical courses, Innovative Project, Internship cum Project work and Project Work. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

| Sl. No. | Category of Course | Continuous Assessment Marks | End Semester Examination |
|---------|--|--|--------------------------|
| 1. | Theory / Practical | 50 | 50 |
| 2. | Theory cum Practical | The distribution of marks shall be decided based on the credit weightage assigned to theory and practical components respectively. | |
| 3. | Innovative Project/ Project Work / Internship cum Project Work | 50 | 50 |
| 4. | Value Added Course | The distribution of marks shall be decided based on the credit the credit weightage assigned | --- |
| 5. | All other Courses | | |

7.2 Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, innovative project and internships shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

7.3 Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 50 marks and the end semester examination shall be for 50 marks. However, the end semester examinations shall be conducted for 100 marks and the marks obtained shall be reduced to 50. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. Three tests shall be conducted for 50 marks each and reduced to 30 marks each. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

7.3.1 The assessment pattern for awarding continuous assessment marks shall be as follows:

| Sl. No. | Type | Max. Marks | Remarks |
|---------|------------|------------|---|
| 1. | Test – I | 30 | Average of best two |
| | Test – II | 30 | |
| | Test - III | 30 | |
| 2. | Tutorial | 15 | Should be of Open Book/Objective Type. Average of best 4 (or more, depending on the nature of the course, as may be approved by Principal) |

| | | | |
|-------|---|----|---|
| 3. | Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes | 05 | To be assessed by the Course Teacher based on any one type. |
| Total | | 50 | Rounded off to the one decimal place |

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

7.3.2 A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).

7.3.3 The end semester examination for theory courses shall be for duration of three hours.

7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 50 marks and the end semester examination shall be for 50 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidate's records shall be maintained.

7.5.1 The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.

7.6 Project Work

7.6.1 Project work shall be carried out individually. Candidates can opt for full time internship (vide clause 7.8) in lieu of project work in third semester. The project work is mandatory for all the candidates.

7.6.2 The Head of the Department shall constitute review committee for project work. There shall be three assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.

7.6.3 The continuous assessment and end semester examination marks for Project Work and the Viva-Voce Examination shall be distributed as below.

| Continuous Assessment (Max. 50 Marks) | | | | | | End Semester Examination (Max. 50 Marks) | | | |
|--|-------|---|-------|---|-------|---|-------------------------------|-------|-------|
| Review I (Max..10 Marks) | | Review II (Max.. 20 Marks) | | Review III (Max. 20 Marks) | | Report Evaluation (Max. 20 Marks) | Viva -Voce (Max. 30 Marks) | | |
| Rv. Com | Guide | Review Committee (excluding guide) | Guide | Review Committee (excluding guide) | Guide | Ext. Exr. | Guide | Exr.1 | Exr.2 |
| 5 | 5 | 10 | 10 | 10 | 10 | 20 | 10 | 10 | 10 |

7.6.4 The Project Report prepared according to approved guidelines and duly signed by the Guide and Project Co-ordinator shall be submitted to Head of the Department. A candidate must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester. This applies to both Internship cum Project work and Project work.

7.6.5 If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.

7.6.6 Every candidate shall, based on his/her project work, publish a paper in a reputed journal or reputed conference in which full papers are published after usual review. A copy of the full paper accepted and proof for that shall be produced at the time of evaluation.

7.6.7 The project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and guide of the project work.

7.6.8 If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.7.

7.6.9 A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

7.7 Innovative Project

The evaluation method shall be same as that of the Project Work as per clause 7.6 excluding clause 7.6.6.

7.8 Internship cum Project Work

Each candidate shall submit a brief report about the internship undergone and a certificate issued from the organization concerned at the time of Viva-voce examination to the review committee. The evaluation method shall be same as that of the Project Work as per clause 7.6 excluding 7.6.6.

7.9 Value Added Course

Two assessments shall be conducted during the value added course duration by the offering department concerned.

7.10 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

7.11 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

7.12 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of Registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SF (Satisfactory). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

8. REQUIREMENTS FOR COMPLETION OF A SEMESTER

8.1 A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.

- 8.1.1** Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.
- 8.1.2** A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.
- 8.1.3** In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.
- 8.1.4** A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.
- 8.1.5** Candidate's progress is satisfactory.
- 8.1.6** Candidate's conduct is satisfactory and he/she was not involved in any indisciplined activities in the current semester.
- 8.2.** The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.
- 8.3** The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

9. REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION

- 9.1** A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.
- 9.2** When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.

- 9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- 10.1** A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- 10.2** The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- 10.3** The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.
- 10.4** If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- 10.5** The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

11. PROVISION FOR BREAK OF STUDY

- 11.1** A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.

- 11.2** The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.
- 11.3** The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- 11.4** The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- 11.5** If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- 11.6** If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

12. PASSING REQUIREMENTS

- 12.1** A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 50 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- 12.2** A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.
- 12.3** For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements, but the grade awarded shall be only the lowest passing grade irrespective of the marks secured.

13. REVALUATION OF ANSWER SCRIPTS

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

**15. AWARD OF LETTER GRADES**

| Range of % of Total Marks | Letter Grade | Grade Point |
|------------------------------------|-----------------|-------------|
| 91 to 100 | O (Outstanding) | 10 |
| 81 to 90 | A+ (Excellent) | 9 |
| 71 to 80 | A (Very Good) | 8 |
| 61 to 70 | B+ (Good) | 7 |
| 50 to 60 | B (Average) | 6 |
| Less than 50 | RA (Reappear) | 0 |
| Satisfactory | SF | 0 |
| Withdrawal | W | - |
| Absent | AB | - |
| Shortage of Attendance in a course | SA | - |

The Grade Point Average (GPA) is calculated using the formula:

$$\text{GPA} = \frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in the specific semester}}{\sum(\text{course credits}) \text{ for all courses in the specific semester}}$$

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

$$\text{CGPA} = \frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in all the semesters so far}}{\sum(\text{course credits}) \text{ for all courses in all the semesters so far}}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the ME / MTech Degree provided the candidate has

- i. Successfully completed all the courses under the different categories, as specified in the regulations.
- ii. Successfully gained the required number of total credits as specified in the curriculum

corresponding to the candidate's programme within the stipulated time (vide clause 5).

- iii. Successfully passed any additional courses prescribed by the respective Board of Studies whenever readmitted under regulations other than R-2020 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

17. CLASSIFICATION OF THE DEGREE AWARDED

17.1 First Class with Distinction:

17.1.1 A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 8.50

(OR)

17.1.2 A candidate who joins from other institutions on transfer or a candidate who gets readmitted and has to move from one regulation to another regulation and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:

- Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Submission of equivalent course list approved by the respective Board of studies.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 9.00

17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all four semesters within six consecutive semesters excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 7.00

17.3 Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

17.4 A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

18. MALPRACTICES IN TESTS AND EXAMINATIONS

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

19. AMENDMENTS

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the Kongu Engineering College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its ME / MTech programme.

**CURRICULUM BREAKDOWN STRUCTURE****Summary of Credit Distribution**

| Category | Semester | | | | Total number of credits | Curriculum Content (% of total number of credits of the program) |

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.Tech & Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Nil | 1 | FC | 3 | 1 | 0 | 4 |

| | | | | | | | |
|--|--|--|--|--|--|--|------------|
| Preamble | This course is designed to provide the solid foundation on mathematical and statistical knowledge for designing various concepts in computing, managing databases, artificial intelligence, compiler and design. | | | | | | |
| Unit - I | Estimation Theory | | | | | | 9+3 |
| Point Estimation – Characteristics of estimators – Unbiased estimators – Methods of Estimation: Method of Maximum Likelihood Estimation – Method of Moments – Correlation – Regression | | | | | | | |
| Unit - II | Multivariate Analysis | | | | | | 9+3 |
| Random vectors and matrices – Mean vectors and covariance matrices – Multivariate normal density and its properties – Principal components – Population principal components – Principal components from standardized variables. | | | | | | | |
| Unit - III | Vector Spaces | | | | | | 9+3 |
| Definition – Subspaces – Linear dependence and independence – Basis and dimension – Row space, Column space and Null Space – Rank and nullity. | | | | | | | |
| Unit - IV | Number Theory | | | | | | 9+3 |
| Divisibility – Prime numbers – Fundamental theorem of arithmetic – Fermat's Little theorem – GCD – Euclid's algorithm – Congruence – Solution of congruences – Chinese remainder theorem. | | | | | | | |
| Unit - V | Automata Theory | | | | | | 9+3 |
| Formal Languages: Introduction – Phrase structure grammar – Types of Grammar – Finite state machine – Finite state automata – Deterministic and Non-deterministic FSA – Equivalence of DFA to NFA – Push down automata – Languages accepted by PDA – Equivalence of Pushdown Automata and Context Free Languages – Turing Machine. | | | | | | | |

20GET11 INTRODUCTION TO RESEARCH
(Common to Engineering and Technology Branches)

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.TECH & Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Nil | 1 | FC | 2 | 1 | 0 | 3 |

| | | | | | | | |
|-----------------|--|--|--|--|--|--|--|
| Preamble | This course will familiarize the fundamental concepts/techniques adopted in research, problem formulation and patenting. Also, will disseminate the process involved in collection, consolidation of published literature and rewriting them in a presentable form using latest tools. | | | | | | |
|-----------------|--|--|--|--|--|--|--|

| | | |
|-----------------|----------------------------|----------|
| Unit - I | Concept of Research | 9 |
|-----------------|----------------------------|----------|

Meaning and Significance of Research: Skills, Habits and Attitudes for Research - Time Management - Status of Research in India. Why, How and What a Research is? - Types and Process of Research - Outcome of Research - Sources of Research Problem - Characteristics of a Good Research Problem - Errors in Selecting a Research Problem - Importance of Keywords - Literature Collection – Analysis - Citation Study - Gap Analysis - Problem Formulation Techniques.

| | | |
|------------------|--------------------------------------|----------|
| Unit - II | Research Methods and Journals | 9 |
|------------------|--------------------------------------|----------|

Interdisciplinary Research - Need for Experimental Investigations - Data Collection Methods - Appropriate Choice of Algorithms / Methodologies / Methods - Measurement and Result Analysis - Investigation of Solutions for Research Problem - Interpretation - Research Limitations. Journals in Science/Engineering - Indexing and Impact factor of Journals - Citations - h Index - i10 Index - Journal Policies - How to Read a Published Paper - Ethical issues Related to Publishing - Plagiarism and Self-Plagiarism.

| | | |
|-------------------|---|----------|
| Unit - III | Paper Writing and Research Tools | 9 |
|-------------------|---|----------|

Types of Research Papers - Original Article/Review Paper/Short Communication/Case Study - When and Where to Publish? - Journal Selection Methods. Layout of a Research Paper - Guidelines for Submitting the Research Paper - Review Process - Addressing Reviewer Comments. Use of tools / Techniques for Research - Hands on Training related to Reference Management Software - EndNote, Software for Paper Formatting like LaTeX/MS Office. Introduction to Origin, SPSS, ANOVA etc., Software for detection of Plagiarism.

| | | |
|------------------|--|----------|
| Unit - IV | Effective Technical Thesis Writing/Presentation | 9 |
|------------------|--|----------|

How to Write a Report - Language and Style - Format of Project Report - Use of Quotations - Method of Transcription Special Elements: Title Page - Abstract - Table of Contents - Headings and Sub-Headings - Footnotes - Tables and Figures - Appendix - Bibliography etc. - Different Reference Formats. Presentation using PPTs.

| | | |
|-----------------|--|----------|
| Unit - V | Nature of Intellectual Property | 9 |
|-----------------|--|----------|

Patents - Designs - Trade and Copyright. Process of Patenting and Development: Technological research - innovation - patenting - development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents.

Lecture: 30, Tutorial:15, Total:45

| COURSE OUTCOMES: | | BT Mapped (Highest Level) |
|---|---|----------------------------------|
| On completion of the course, the students will be able to | | |
| CO1 | list the various stages in research and categorize the quality of journals. | Analyzing (K4) |
| CO2 | formulate a research problem from published literature/journal papers | Evaluating (K5) |
| CO3 | write, present a journal paper/ project report in proper format | Creating (K6) |
| CO4 | select suitable journal and submit a research paper. | Applying (K3) |
| CO5 | compile a research report and the presentation | Applying (K3) |

| Mapping of COs with POs and PSOs | | | | | |
|---|------------|------------|------------|------------|------------|
| COs/POs | PO1 | PO2 | PO3 | PO4 | PO5 |
| CO1 | 3 | 2 | 1 | | |
| CO2 | 3 | 2 | 3 | | |
| CO3 | 3 | 3 | 1 | | |
| CO4 | 3 | 2 | 1 | | |
| CO5 | 3 | 2 | 1 | | |

1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

| ASSESSMENT PATTERN - THEORY | | | | | | | |

20MIT13 – NETWORK DESIGN AND TECHNOLOGIES

| Programme & Branch | M.TECH. & Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|----------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Computer Networks | 1 | PC | 3 | 1 | 0 | 4 |

Preamble This course provides insight into Network design, tools for monitoring the network and advanced topics in Networks such as Wireless network protocols, 4G and 5G networks, Software-Defined Networks.

Unit-I **Network Design Fundamentals** **9**

Introduction -Cooperative communications -The OSI model -The TCP/IP model -The Internet protocols-Networking hardware-Physical connectivity-Virtual connectivity.

Unit – II **Network monitoring and Analysis** **9**

An effective network monitoring LAN and WAN - Monitoring your network -The dedicated monitoring server – monitoring various network parameters - characteristics of monitoring tools - Types of monitoring tools-Spot check tools-Log analysers-Trending tools-Realtime tools-Benchmarking-Interpret the traffic graph - Monitoring RAM and CPU usage.

Unit - III **Wireless Networks** **9**

IEEE802.16 and WiMAX – Security – Advanced 802.16 Functionalities – Mobile WiMAX - 802.16e – Network Infrastructure – WLAN – Configuration – Management Operation – Security – IEEE 802.11e and WMM – QoS – Comparison of WLAN and UMTS.

Unit - IV **4G and 5G Networks** **9**

LTE – Network Architecture and Interfaces – FDD Air Interface and Radio Networks –Scheduling – Mobility Management and Power Optimization – LTE Security Architecture – Interconnection with UMTS and GSM – LTE Advanced (3GPP Release 10)- 4G Networks and Composite Radio Environment – Protocol Boosters – Hybrid 4G Wireless Networks Protocols – Green Wireless Networks – Physical Layer and Multiple Access – Introduction to 5G.

Unit - V **Software Defined Networks** **9**

Software Defined Networks: Introduction – Centralized and Distributed Control and Data Planes – Open Flow – SDN Controllers – Data centre concepts and constructs : Introduction- The Multitenant Data Center - The Virtualized Multitenant Data Center- Orchestration - Connecting a Tenant to the Internet:VPN - Virtual Machine Migration and Elasticity - SDN Solutions for the Data Center Network – VLANs - Network Topology – Building an SDN Framework :The Juniper SDN Framework.

Lecture:45; Tutorial : 15; Total: 60

**20MIT14 - DATA STRUCTURES AND ANALYSIS OF ALGORITHMS**

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.TECH & Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Nil | 1 | PC | 3 | 0 | 0 | 3 |

| | | | | | | | |
|---|---|--|--|--|--|--|----------|
| Preamble | Provides insight into the intrinsic nature of the problem as well as possible solution techniques, independent of programming language / programming paradigm/computer hardware/ implementation aspect. | | | | | | |
| Unit – I | Industrial catalysis | | | | | | 9 |
| The Role of Algorithms in Computing- Growth of Functions - Analysis of Recursive and Non-recursive Functions – Lists - Heap Sort – Quick Sort – Sorting in Linear Time | | | | | | | |
| Unit - II | Advanced Data Structures | | | | | | 9 |
| Binary Search Trees-Red-Black Trees-Augmenting Data Structures - B- Trees – Binomial Heaps - Fibonacci Heaps | | | | | | | |
| Unit - III | Algorithm Design Techniques | | | | | | 9 |
| Overview of Basic Design Techniques: Divide and Conquer (Strassen 's Matrix Multiplication) – Dynamic Programming (Rod Cutting) - Greedy Algorithms (Huffman Codes) - String Matching: Naïve Algorithm - Rabin Karp Algorithm - String matching with finite automata - Knuth-Morris-Pratt Algorithm - Computational Geometry: Line Segment Properties - Determining segments intersection – Convex Hull – Closest pair of points. | | | | | | | |
| Unit - IV | Algorithm Design Techniques | | | | | | 9 |
| Elementary Graph Algorithms - Minimum Spanning Trees - Single Source Shortest Paths - All Pairs Shortest Paths - Maximum Flow | | | | | | | |
| Unit - V | NP and Approximation Algorithm | | | | | | 9 |
| NP-Completeness: Polynomial Time verification, NP Completeness and Reducibility - NP Completeness Proofs - NP Complete Problems - Approximation Algorithms: Traveling Salesman Problem - Sum of Subset Problem - Vertex Cover Problem | | | | | | | |

**20MIT15 - ADVANCED DATABASE TECHNOLOGIES**

| Programme & Branch | M.TECH. & Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|---|------|----------|---|---|---|--------|
| Prerequisites | Fundamentals of Database Management Systems | 1 | PC | 3 | 0 | 0 | 3 |

| | |
|----------|--|
| Preamble | To acquire knowledge on advanced databases like parallel and distributed database, object-oriented database, active database, temporal database, spatial database, mobile database, multimedia database, XML database and cloud database to effectively store the data for real time applications. |
|----------|--|

| | | |
|-----------------|---|----------|
| Unit - I | Parallel and Distributed Databases | 9 |
|-----------------|---|----------|

Database System Architectures: Centralized and Client-Server Architectures - Server System Architectures - Parallel Systems - Distributed Systems - Parallel Databases: I/O Parallelism - Inter and Intra Query Parallelism - Inter and Intra operation Parallelism - Design of Parallel Systems - Distributed Database Concepts - Distributed Data Storage - Distributed Transactions - Commit Protocols - Concurrency Control - Distributed Query-Processing - Case Studies.

| | | |
|------------------|----------------------------------|----------|
| Unit - II | Object Oriented Databases | 9 |
|------------------|----------------------------------|----------|

Object Oriented Databases - Introduction - Weakness of RDBMS - Object Oriented Concepts - Storing Objects in Relational Databases - Next Generation - Database Systems - Object Oriented Data models - OODBMS Perspectives - Persistence - Issues in OODBMS - Object Oriented Database Management System Manifesto - Advantages and Disadvantages of OODBMS - Object Oriented Database Design - OODBMS Standards and Systems - Object Management Group - Object Database Standard ODMG - Object Relational DBMS - Postgres - Comparison of ORDBMS and OODBMS.

| | | |
|-------------------|------------------------------|----------|
| Unit - III | Intelligent Databases | 9 |
|-------------------|------------------------------|----------|

Active Databases: Syntax and Semantics (Starburst, Oracle, DB2) – Taxonomy – Applications - Design Principles for Active Rules - Temporal Databases: Overview of Temporal Databases- TSQL2 - Deductive Databases: Logic of Query Languages - Datalog - Recursive Rules- Syntax and Semantics of Datalog Languages - Implementation of Rules and Recursion - Recursive Queries in SQL - Spatial Databases - Spatial Data Types - Spatial Relationships - Spatial Data Structures - Spatial Access Methods - Spatial DB Implementation.

| | | |
|------------------|-----------------------------|----------|
| Unit - IV | Advanced Data Models | 9 |
|------------------|-----------------------------|----------|

Mobile Databases: Location and Handoff Management - Effect of Mobility on Data Management - Location Dependent Data Distribution-Mobile Transaction Models-Concurrency Control - Transaction Commit Protocols - Multimedia Databases - Information Retrieval - Data Warehousing - Data Mining - Text Mining.

| | | |
|-----------------|------------------------------|----------|
| Unit - V | Emerging Technologies | 9 |
|-----------------|------------------------------|----------|

XML Databases: XML Data Model - DTD - XML Schema - XML Querying - Web Databases - Geographic Information Systems - Biological Data Management - Cloud Based Databases: Data Storage Systems on the Cloud - Cloud Storage Architectures - Cloud Data Models - Query Languages - Introduction to Big Data - Storage - Analysis.

20MIT21 - BIG DATA ANALYTICS

| Programme & Branch | M.TECH. – Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|----------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Database Management Systems | 2 | PC | 3 | 1 | 0 | 4 |

| | | | | | | | |
|----------|--|--|--|--|--|--|--|
| Preamble | Provides basic knowledge about Big data, its framework and storage in databases and prepares the students to perform various analytical operations and visualize the results | | | | | | |
|----------|--|--|--|--|--|--|--|

| | | |
|-----------------|-----------------|------------|
| Unit - I | Big Data | 9+3 |
|-----------------|-----------------|------------|

Definition – Wholeness of big data: Understanding – Capturing –Benefits and management – Organizing and analyzing – Challenges – Big data architecture – Big data sources and applications: Big data sources – Machine to machine Communications- Big data Applications.

| | | |
|------------------|----------------------------|------------|
| Unit - II | MapReduce Framework | 9+3 |
|------------------|----------------------------|------------|

Introducing Hadoop – Starting Hadoop – Components of Hadoop: Working with files in HDFS - Anatomy of a MapReduce program – Reading and writing - Writing basic MapReduce programs: Getting the patent data set-Constructing the basic template of a MapReduce program-Counting things-Adapting for Hadoop’s API changes-Streaming in Hadoop- Improving performance with combiners – Hadoop Ecosystem.

| | | |
|-------------------|-------------------------------|------------|
| Unit - III | NoSQL Database Systems | 9+3 |
|-------------------|-------------------------------|------------|

Introduction to NoSQL – CAP theorem - MongoDB : Data types – MongoDB Query Language – Cassandra: Features of Cassandra- Data types – CRUD- Collections Alter Commands – Import and Export- Querying system tables

| | | |
|------------------|----------------------------|------------|
| Unit - IV | Mining Data Streams | 9+3 |
|------------------|----------------------------|------------|

Stream Data Model - Sampling Data in a Stream–Filtering Streams–Counting Distinct Elements in a Stream–Estimating Moments–Counting Ones in a Window–Decaying Window - Stream processing with SPARK and Kafka.

| | | |
|-----------------|---------------------|------------|
| Unit - V | Case Studies | 9+3 |
|-----------------|---------------------|------------|

Implement using open source frameworks/tools : Time Series Analysis - Text analysis – Social Network Analysis - Data streams

Lecture:45; Tutorial : 15; Total: 60

20MIT22 - INTERNET OF THINGS

| | | | | | | | |
|------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme& Branch | M.TECH. – Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Microprocessors/ Microcontrollers/ Computer Organization/ Networks | 2 | PC | 3 | 1 | 0 | 4 |

Preamble This course is intended to give students a thorough understanding of IoT and its applications and to design, develop and analyze the various tools for building IoT applications also to develop IoT infrastructure for various real time applications.

Unit – I **Introduction to Internet of Things and Design Methodology** **9+3**

Definition and Characteristics of IoT - Physical Design of IoT - IoT Protocols - IoT Communication Models - IoT Communication APIs - IoT enabled Technologies - IoT Levels and Templates - M2M - Difference between M2M and IoT - Software defined networks - Network function virtualization - IoT Platform design Methodologies.

Unit – II **IoT Architecture and Protocols** **9+3**

Four Pillars of IoT - DNA of IoT - Middleware for IoT: Overview - Communication middleware for IoT - LBS and Surveillance Middleware - Protocol Standardization for IoT - Efforts - M2M and WSN Protocols - SCADA and RFID Protocols - Unified Data Standards.

Unit – III **Introduction to Python and IoT Physical Devices** **9+3**

Language features of Python - Data types - Data structures - Control of flow – Functions – Modules – Packaging - File handling - Data/time operations – Classes - Exception handling Python packages - JSON, XML, HTTPLib, URLLib, SMTPLib - Introduction to Raspberry PI - Interfaces (serial, SPI, I2C) Programming - Python program with Raspberry PI with focus of interfacing external gadgets - Controlling output - Reading input from pins.

Unit – IV **Cloud Storage and Analysis** **9+3**

Various Real time applications of IoT - Connecting IoT to cloud - Cloud Storage for IoT - Data Analytics for IoT - Software and Management Tools for IoT

Unit – V **Cyber Security and Privacy in Internet of Things** **9+3**

Security and Privacy issues and challenges - Mitigating Security and Privacy Challenges - Security Assessment of an IoT Solution - Attacks and Countermeasures: Perception Layer - Network Layer - Transport Layer - Application Layer - IoT security requirements based on CIA Principles - Security in IoT Protocols.

Lecture:45; Tutorial : 15; Total: 60

| COURSE OUTCOMES: On completion of the course, the students will be able to | | BT Mapped (Highest Level) |
|--|---|--------------------------------------|
| CO1: | describe the physical and logical design of IoT and identify the appropriate IoT level and develop design methodologies for a given application | Applying (K3) |
| CO2: | explain the architecture, need for middleware and the role of different standardization protocols | Understanding (K2) |
| CO3: | recall the basic concepts and packages of Python related to IoT for interfacing with IoT devices | Applying (K3) |
| CO4: | develop simple real time applications, upload the data onto the cloud and perform data analytics | Applying (K3) |
| CO5: | identify the security threats against a given IoT system and suggest simple countermeasures | Understanding (K2) |

| Mapping of COs with POs and PSOs | | | | | |
|---|------------|------------|------------|------------|------------|
| COs/POs | PO1 | PO2 | PO3 | PO4 | PO5 |
| CO1 | 3 | 2 | 1 | 1 | |

**20MIT23 - MACHINE LEARNING TECHNIQUES**

| Programme & Branch | M.TECH. – Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|----------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Nil | 2 | PC | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|--|--|--|--|--|--|--|
| Preamble | Provides a concise introduction to the fundamental concepts of machine learning and popular machine learning algorithms. | | | | | | |
|----------|--|--|--|--|--|--|--|

| | | |
|-----------------|----------------------------|----------|
| Unit – I | Supervised Learning | 9 |
|-----------------|----------------------------|----------|

Definition of Machine Learning - Examples of Machine Learning Applications. Supervised Learning: Learning a Class from Examples - VC Dimension - PAC Learning - Noise - Learning Multiple Classes - Regression - Model Selection and Generalization - Dimensions of a Supervised Machine Learning Algorithm. Dimensionality Reduction: Introduction - Subset Selection – Principal Component Analysis- Feature Embedding - Factor Analysis.

| | | |
|------------------|--------------------------------------|----------|
| Unit – II | Tree And Probabilistic Models | 9 |
|------------------|--------------------------------------|----------|

Learning with Trees – Decision Trees – Constructing Decision Trees – Classification and Regression Trees – Different ways to Combine Classifiers – Boosting – Bagging — Gaussian Mixture Models – Nearest Neighbor Methods – Unsupervised Learning – K means Algorithm.

| | | |
|-------------------|------------------------------|----------|
| Unit – III | Multilayer Perceptron | 9 |
|-------------------|------------------------------|----------|

Introduction - The Perceptron - Training a Perceptron - Learning Boolean Functions - Multilayer Perceptrons - MLP as a Universal Approximator - Backpropagation Algorithm - Training Procedures - Tuning the Network Size - Dimensionality Reduction - Learning Time

| | | |
|------------------|------------------------|----------|
| Unit – IV | Kernel Machines | 9 |
|------------------|------------------------|----------|

Introduction - Optimal Separating Hyperplane - Soft Margin Hyperplane - v-SVM - Kernel Trick - Vectorial Kernels - Defining Kernels - Multiple Kernel Learning - Multiclass Kernel Machines - One class Kernel Machines - Kernel Dimensionality Reduction.

| | | |
|-----------------|-------------------------------|----------|
| Unit – V | Reinforcement Learning | 9 |
|-----------------|-------------------------------|----------|

Introduction - Single State Case-Elements of Reinforcement Learning - Model-Based Learning - Temporal Difference Learning - Generalization - Partially Observable States. Design of Machine Learning Experiments: Introduction - Factors, Response, and Strategy of Experimentation - Response Surface Design - Randomization, Replication, and Blocking - Guidelines for Machine Learning Experiments.

20MIT24 -MODERN OPERATING SYSTEMS

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Operating systems | 2 | PC | 3 | 0 | 0 | 3 |

| | | | | | | | |
|---|---|--|--|--|--|--|----------|
| Preamble | The concepts of operating system to distributed environment like cloud computing, mobile computing etc. | | | | | | |
| Unit – I | Process Synchronization | | | | | | 9 |
| Introduction - Functions of OS - Design Approaches - Types of advanced OS, Synchronization mechanisms - Critical Section Problem - Process Deadlocks: Models of Deadlock - Models of Resources. | | | | | | | |
| Unit – II | Distributed Operating Systems | | | | | | 9 |
| Issues in Distributed Operating System - Architecture - Communication Primitives - Lamport's Logical clocks - Causal Ordering of Messages - Distributed Mutual Exclusion Algorithms - Centralized and Distributed Deadlock Detection Algorithms - Agreement Protocols. | | | | | | | |
| Unit – III | Distributed Resource Management | | | | | | 9 |
| Distributed File Systems - Design Issues - Distributed Shared Memory - Algorithms for Implementing Distributed Shared memory - Issues in Load Distributing - Load Distributing Algorithms - Synchronous and Asynchronous Check Pointing and Recovery. | | | | | | | |
| Unit – IV | Fault Tolerance and Security | | | | | | 9 |
| Fault Tolerance - Two-Phase Commit Protocol - Non-blocking Commit Protocol - Security and Protection. Multiprocessor Operating Systems: Structures - Design Issues - Threads - Process Synchronization - Processor Scheduling - Memory Management - Reliability / Fault Tolerance. | | | | | | | |
| Unit – V | Database Operating Systems | | | | | | 9 |
| Introduction - Concurrency Control - Distributed Database Systems - Concurrency Control Algorithms. Real Time and Mobile Operating Systems: Basic Model of Real Time Systems – Characteristics - Applications of Real Time Systems - Real Time Task Scheduling - Overview of Mobile Operating Systems. | | | | | | | |

20MIL21 -MACHINE LEARNING LABORATORY

| | | | | | | | |
|-------------------------------|---|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.TECH. - Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Basics of python | 2 | PC | 0 | 0 | 2 | 1 |
| Preamble | This course provides use of data sets in implementing the machine learning algorithms | | | | | | |

List of Exercises / Experiments :

| | |
|-----|--|
| 1. | Implementation of linear regression |
| 2. | Implementation of Decision tree |
| 3. | Implementation of k-means clustering |
| 4. | Implementation of k-NN |
| 5. | Implementation of Backpropagation algorithm |
| 6. | Comparison of linear regression and decision tree algorithm for the given dataset |
| 7. | Comparison of kernel functions of Support Vector Machine for the given dataset |
| 8. | Demonstrate the diagnosis of heart patients using standard Heart Disease Data Set using any one of the machine learning algorithms |
| 9. | Prediction Of Soil Quality Using Machine Learning Techniques |
| 10. | Quality Analysis of Fruits and Vegetables using Machine Learning Techniques |

Practical : 30,Total: 30

20MIE01 - ETHICAL HACKING

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Nil | 1 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|---|---|--|--|--|--|--|----------|
| Preamble | This subject provides the fundamental knowledge about security permissions in computer, internet and system and how to secure from the various vulnerabilities and provide countermeasures for real world applications. | | | | | | |
| Unit – I | Casing the Establishment | | | | | | 9 |
| What is foot printing? - Internet Foot printing- Scanning – Determining if the system is alive – Determining which services are running or Listening – Detecting the operating system – Processing and storing scan data - Enumeration - basic banner grabbing- Enumerating Common Network services- Case study- Network Security Monitoring. | | | | | | | |
| Unit – II | System Hacking | | | | | | 9 |
| Introduction – Cracking password – Password cracking websites – Password guessing Algorithms – Password Cracking Tools – Countermeasure – Escalating Privileges- Executing Applications – Key loggers and spywares. | | | | | | | |
| Unit – III | Infrastructure and Hardware Hacking | | | | | | 9 |
| Remote connectivity and VoIP Hacking - Preparing to dial up- War – Dialing - Brute-Force Scripting - PBX hacking - Voice mail hacking - VPN hacking – Hacking Hardware – Physical access –Hacking Devices – Default Configurations – Reverse Engineering Hardware. | | | | | | | |
| Unit – IV | Wireless and Firewall Hacking | | | | | | 9 |
| Wireless Equipment – Discovery and monitoring - Denial of Service Attacks – Common Dos Attack Techniques - DoS Countermeasures - Encryption attacks –Authentication attacks - Firewalls - Firewalls landscape - Firewall Identification - Scanning Through firewalls - Packet Filtering - Application Proxy Vulnerabilities. | | | | | | | |
| Unit – V | Application Hacking and Countermeasures | | | | | | 9 |
| Web and Database Hacking – Web Server Hacking - Web application Hacking - Common web application Vulnerabilities – Database Hacking – Mobile Hacking – Hacking android – iOS. | | | | | | | |

20MIE02 - MULTIMEDIA COMPRESSION TECHNIQUES

| | | | | | | | | | | |
|------------------------------|---------------------------------------|-------------|-----------------|--|--|--|----------|----------|----------|---------------|
| Programme& Branch | M.TECH. Information Technology | Sem. | Category | | | | L | T | P | Credit |
| Prerequisites | Computer Networks | 1 | PE | | | | 3 | 0 | 0 | 3 |

| | |
|-----------------|--|
| Preamble | The aims of this course are to study methods for handling and compressing various kinds of data, such as text, images, audio and video data and understand data compression techniques for multimedia and other applications, in particular to the Internet. |
|-----------------|--|

| | | |
|-----------------|---------------------|----------|
| Unit – I | Introduction | 9 |
|-----------------|---------------------|----------|

Special features of Multimedia – Graphics and Image Data Representations – Popular File formats – Fundamental Concepts in Video – Digital Audio – Storage requirements for multimedia applications –Need for Compression – Lossy & Lossless compression techniques– Overview of Source Models – Source coding – Scalar and Vector quantization

| | | |
|------------------|-------------------------|----------|
| Unit – II | Text Compression | 9 |
|------------------|-------------------------|----------|

Compression techniques: Shannon- Fano coding – Huffman coding – Adaptive Huffman Coding – Arithmetic coding – Dictionary techniques: LZW algorithm

| | | |
|-------------------|--------------------------|----------|
| Unit – III | Audio Compression | 9 |
|-------------------|--------------------------|----------|

Audio compression techniques – μ - Law and A-Law companding- Differential Encoding –DPCM- ADPCM – DM – Optimal Predictors and Optimal Quantization –Application to speech coding: G.722 – Application to audio coding : MPEG audio, Speech compression techniques : Formants and CELP Vocoders

| | | |
|------------------|--------------------------|----------|
| Unit – IV | Image Compression | 9 |
|------------------|--------------------------|----------|

Transform Coding: JPEG Standard – Sub band coding algorithms – Design of Filter banks – Implementation using filters- Wavelet based compression: EZW- SPIHT coders – JPEG 2000 standards- JBIG- JBIG2 standards

| | | |
|-----------------|--------------------------|----------|
| Unit – V | Video Compression | 9 |
|-----------------|--------------------------|----------|

Video compression Based on Motion Compensation – Search for Motion Vectors – H.261 – MPEG Video Coding I: MPEG – 1 and 2 – MPEG Video Coding II: MPEG – 4: Object Based Visual Coding –Synthetic Object Coding –Object types-Profiles and Levels – MPEG 7.

20MIE03 - CLOUD COMPUTING

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Nil | 1 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|---|
| Preamble | Provides knowledge about basic concepts of cloud computing, types of cloud services, technologies and service providers and to understand the distinct basic cloud architecture models and advanced architecture models for complex environments and the security issues and threats in cloud environments. |
|----------|---|

| | | |
|-----------------|-------------------------------|----------|
| Unit – I | Cloud Computing Basics | 9 |
|-----------------|-------------------------------|----------|

Introduction to Cloud Computing – Cloud computing reference model- Essential Characteristics - Benefits and challenges of cloud computing- Roles and Boundaries-Cloud Delivery Models - Deployment models -Cloud computing vendors.

| | | |
|------------------|----------------------------------|----------|
| Unit – II | Cloud Enabling Technology | 9 |
|------------------|----------------------------------|----------|

Data Center Technology-Remote operation and management-Facilities- Computing, Storage, Network Hardware- Virtualization Technology-Types of virtualization- OS based virtualization- Hardware based Virtualization- Virtualization Management-Web Technology- Multitenant Technology- Service Technology- Case Study.

| | | |
|-------------------|---------------------------------------|----------|
| Unit – III | Fundamental Cloud Architecture | 9 |
|-------------------|---------------------------------------|----------|

Work load Distribution architecture- Resource Pooling Architecture- Dynamic Scalability-Elastic Resource Capacity-Service load balancing-Redundant Storage Architecture- Case Study.

| | | |
|------------------|------------------------------------|----------|
| Unit – IV | Advanced Cloud Architecture | 9 |
|------------------|------------------------------------|----------|

Hypervisor clustering architecture- Cloud Balancing architecture- Resource Reservation- Dynamic failure detection and recovery architecture-Rapid provisioning- Storage workload management architecture-Multipath resource access architecture-Cross Storage device vertical tiering architecture

| | | |
|-----------------|--------------------------|----------|
| Unit – V | Security in Cloud | 9 |
|-----------------|--------------------------|----------|

Cloud security fundamentals- Basic terms and concepts- Threat agents- Cloud Security Threats-Encryption- Hashing- Digital Signature-Public Key Infrastructure- Identity and Access Management- Single Sign on-Cloud Based Security Groups.

**20MIE04 - INFORMATION THEORY AND CODING**

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|---------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Communication Networks./Systems | 1 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|--|
| Preamble | Information Theory and Coding deals with concept of information and its efficient, error-free and secure delivery of information using binary data streams. It also provides a complete understanding of error-control coding techniques over noisy communication channel. |
|----------|--|

| | | |
|-----------------|----------------------|----------|
| Unit – I | Source Coding | 9 |
|-----------------|----------------------|----------|

Introduction to Information theory – Uncertainty and Information – Entropy and Average Mutual Information – Information Measure for Continuous Random Variables – Source coding theorem – Huffman Coding – Shannon-Fano-Elias Coding – Arithmetic Coding – Lempel – Ziv Algorithm – Run Length Encoding and the PCX Format – Rate Distortion Function

| | | |
|------------------|------------------------------------|----------|
| Unit – II | Channel Capacity and Coding | 9 |
|------------------|------------------------------------|----------|

Introduction – Channel Model – Channel Capacity – Channel Coding – Information Capacity Theorem – Error control coding: Introduction to Error Correction Codes – Basic Definitions – Matrix Description of Linear Block Codes – Equivalent Codes – Parity Check Matrix – Decoding of Linear Block Code – Syndrome Decoding – Error Probability after Coding – Perfect Codes – Hamming Codes – Low Density Parity Check (LDPC) Codes – Optimal Linear Codes – Maximum Distance Separable (MDS) Codes

| | | |
|-------------------|---------------------|----------|
| Unit – III | Cyclic Codes | 9 |
|-------------------|---------------------|----------|

Introduction to the Cyclic Codes – Polynomials – Division Algorithm for Polynomials – A Method for Generating Cyclic Codes – Matrix Description of Cyclic Codes – Burst Error Correction – Fire Codes – Golay Codes – Cyclic Redundancy Check (CRC) Codes – Circuit Implementation of Cyclic Codes

| | | |
|------------------|---|----------|
| Unit – IV | Bose-Chaudhuri Hocquenghem (BCH) Codes | 9 |
|------------------|---|----------|

Introduction to BCH Code – Primitive Elements – Minimal Polynomials – Generator Polynomials in Terms of Minimal Polynomials – Some Examples of BCH Codes – Decoding of BCH codes – Reed-Solomon Codes – Implementation of Reed –Solomon Encoders and Decoders – Performance of RS Codes Over Real Channels – Nested Codes

| | | |
|-----------------|----------------------------|----------|
| Unit – V | Convolutional Codes | 9 |
|-----------------|----------------------------|----------|

Introduction to Convolutional Codes – Tree Codes and Trellis Codes – Polynomial Description of Convolution Codes – Distance Notions for Convolutional Codes – The Generating Function – Matrix Description of Convolutional Codes – Viterbi Decoding and Convolutional Codes – Distance Bounds for Convolutional Codes – Turbo Codes

**20MIE06 – BLOCKCHAIN TECHNOLOGIES**

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.Tech & Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Basics of Cryptography | 2 | PE | 3 | 0 | 0 | 3 |

| | |
|-----------------|---|
| Preamble | The widespread popularity of digital cryptocurrencies has led the foundation of Blockchain. This course covers both the conceptual as well as application aspects of Blockchain. This includes the fundamental design and architectural primitives of Blockchain, the system and the security aspects, along with various use cases from different application domains. |
|-----------------|---|

| | | |
|-----------------|-----------------------------------|----------|
| Unit - I | Introduction to Blockchain | 9 |
|-----------------|-----------------------------------|----------|

Financial transaction – Ledger – trustless system – Elements of blockchain – types – Byzantine General Problems – benefits – challenges – Components and structure of blockchain: blocks – chain – hashing – digital signatures – example – miners – validators – smart contracts - speed – decentralization Vs distributed systems.

| | | |
|------------------|---------------------------------------|----------|
| Unit - II | Cryptography behind Blockchain | 9 |
|------------------|---------------------------------------|----------|

Principles – historical perspectives – classical cryptography- types – symmetric – asymmetric – signatures – hashing. **Bitcoin:** History – Why bitcoin – keys and addresses – transactions – blocks – bitcoin network – wallets.

| | | |
|-------------------|------------------|----------|
| Unit - III | Consensus | 9 |
|-------------------|------------------|----------|

Practical Byzantine fault tolerance algorithm – Proof of Work - Proof of Stake - Proof of Authority - Proof of Elapsed time Cryptocurrency Wallets: Introduction to cryptocurrency wallets - Transactions - Types of cryptocurrency wallets – Tenancy - Alternate Blockchains.

| | | |
|------------------|---|----------|
| Unit - IV | Hyperledger and Enterprise Blockchains | 9 |
|------------------|---|----------|

History - Hyperledger projects - Hyperledger Burrow - Hyperledger Sawtooth - Hyperledger Fabric - Hyperledger Iroha - Hyperledger Indy - Tools in Hyperledger – Deploy a simple application on IBM cloud.

| | | |
|-----------------|-----------------|----------|
| Unit - V | Ethereum | 9 |
|-----------------|-----------------|----------|

Introducing Ethereum - Components of Ethereum - Ethereum accounts - Ethereum network - Ethereum clients - Ethereum gas - Ethereum virtual machine - Ethereum block – Ether - Basics of Solidity - Ethereum Development.

**20MIE07 - WIRELESS SENSOR NETWORKS**

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.Tech & Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Wireless Networks | 2 | PE | 3 | 0 | 0 | 3 |

Preamble This course will cover the most recent research topics in wireless sensor networks and IPV6 transition. Topics such as MAC layer and PHY layer functionalities, 6LoWPAN fundamentals, routing, mobility and other advanced topics are precisely covered.

Unit - I **IEEE 802.15.4 PHY Layer** **9**

WSN Introduction, WPAN, network topologies, superframe structure, data transfer model, frame structure, slotted CSMA, IEEE 802.15.4 PHY: frequency range, channel assignments, minimum LIFS and SIFS periods, O-QPSK PPDU format, modulation and spreading. Simulation of data transfer model using Cooja simulator.

Unit - II **IEEE 802.15.4 MAC Layer** **9**

MAC functional description, MAC frame formats and MAC command frames, Simulation of WSN traffic model using Cooja simulator.

Unit - III **6LoWPAN Fundamentals** **9**

6LoWPAN-Introduction, protocol stack, addressing, L2 forwarding, L3 routing, Header Compression, Fragmentation and Reassembly, Commissioning, Neighbor Discovery. Analyzing of sensor data exchange using Wireshark.

Unit - IV **6LoWPAN Mobility and Routing** **9**

Mobility: types, Mobile IPv6, Proxy MIPv6, NEMO, Routing: Overview, ROLL, border routing, RPL, MRPL, Edge Router Integration (Cooja simulation).

Unit - V **IPv6 Transition and Application Protocols** **9**

IPv4 Interconnectivity: IPv6 transition, IPv6-in-IPv4 tunneling, application protocols: design issues, MQTT-S, ZigBee CAP.

Lecture: 45, Total: 45

**20MIE08 - MULTICORE ARCHITECTURES**

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--|------|----------|---|---|---|--------|
| Prerequisites | Computer Architecture and Organization | 2 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|--|---|--|--|--|--|--|----------|
| Preamble | This course will introduce the students to the world of multi-core computer architectures and focuses on delivering an in-depth exposure in memory-subsystems and interconnects and few introductory sessions on advanced superscalar processors. | | | | | | |
| Unit – I | Fundamentals of Quantitative Design and Analysis | | | | | | 9 |
| Classes of Computers - Trends in Technology, Power, Energy and Cost - Dependability - Measuring, Reporting and Summarizing Performance - Quantitative Principles of Computer Design - Classes of Parallelism - ILP, DLP, TLP and RLP - Multi Threading - SMT and CMP Architectures - Limitations of Single Core Processors - The MultiCore era - Case Studies of Multi Core Architectures. | | | | | | | |
| Unit – II | Memory Hierarchy Design | | | | | | 9 |
| Introduction - Optimizations of Cache Performance - Memory Technology and Optimizations - Protection: Virtual Memory and Virtual Machines - Design of Memory Hierarchies - Case Studies | | | | | | | |
| Unit – III | DLP in Vector, SIMD and GPU Architectures: Vector | | | | | | 9 |
| Architectures - SIMD Instruction Set Extensions for Multimedia - Graphics Processing Units - Detecting and Enhancing Loop Level Parallelism - Case Studies. | | | | | | | |
| Unit – IV | TLP and Multiprocessors | | | | | | 9 |
| Symmetric and Distributed Shared Memory Architectures - Cache Coherence Issues - Performance Issues - Synchronization Issues - Models of Memory Consistency - Inter Connection Networks - Buses, Crossbar and Multi-stage Interconnection Networks. | | | | | | | |
| Unit – V | RLP and DLP in Warehouse Scale Architectures | | | | | | 9 |
| Programming Models and Workloads for Warehouse scale Computers - Architecture for Warehouse scale computing - Domain Specific Architectures: Introduction - Guidelines for DSAs- Example Domain: Deep Neural Network - Google's Tensor Processing Unit - An interface Data Center Accelerator. | | | | | | | |

20MIE09 - DISTRIBUTED SYSTEMS

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Computer Networks | 2 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|---|
| Preamble | Provide principles of distributed systems, including design and architecture, algorithms, locking, recovery, Replication and handling of failures in distributed environment. |
|----------|---|

| | | |
|-----------------|---------------------|----------|
| Unit – I | Introduction | 9 |
|-----------------|---------------------|----------|

Characteristics- Design goals- Types of distributed systems- **Architectures:** Architecture styles- Middleware organization- System architecture- Example architecture- the network file system.

| | | |
|------------------|----------------|----------|
| Unit – II | Process | 9 |
|------------------|----------------|----------|

Threads- Virtualization- Clients- Servers- Code migration. Communications: Foundations- Remote procedure call- Message-oriented communication- multicast communication.

| | | |
|-------------------|---------------|----------|
| Unit – III | Naming | 9 |
|-------------------|---------------|----------|

Names, identifiers, addresses- flat naming- Structured naming- attribute based naming. **Coordination:** Clock synchronization- Logical clocks- Mutual Exclusion- Election algorithms- Location systems.

| | | |
|------------------|------------------------------------|----------|
| Unit – IV | Consistency and Replication | 9 |
|------------------|------------------------------------|----------|

Introduction -Data-centric consistency models- Client-centric consistency models- Replica management- Consistency Protocols

| | | |
|-----------------|------------------------|----------|
| Unit – V | Fault Tolerance | 9 |
|-----------------|------------------------|----------|

Introduction- Process resilience- Reliable client-server communication- Reliable group communication- Distributed commit-Recovery

**20MIE10 - INFORMATION STORAGE MANAGEMENT**

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|---|------|----------|---|---|---|--------|
| Prerequisites | Computer Networks and Database Management Systems | 2 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|--|--|--|--|--|--|--|
| Preamble | Information storage management offers essential details about various storage systems, storage networking technologies and business continuity solutions along with management techniques in order to store, manage, and protect digital information in classic, virtualized, and cloud environments | | | | | | |
|----------|--|--|--|--|--|--|--|

| | | |
|-----------------|------------------------|----------|
| Unit – I | Storage Systems | 9 |
|-----------------|------------------------|----------|

Introduction to evolution of storage architecture, key data center elements, virtualization, and cloud computing. Components of storage system environments – Host (or computer), connectivity, storage, and application in both classic and virtual environments. RAID implementations, techniques and levels along with the impact of RAID on application performance. Components of intelligent storage provisioning and intelligent storage implementations.

| | | |
|------------------|--|----------|
| Unit – II | Storage Networking Technologies | 9 |
|------------------|--|----------|

: Fibre channel SAN components, connectivity options, and topologies including access protection mechanism —Zoning, FC protocol stack, addressing operations, SAN-based virtualization and VSAN technology, iSCSI and FCIP protocols for storage access over IP network, Converged protocol FCoE and its components Network Attached Storage (NAS) – components, protocol and operations, File level storage virtualization. Object based storage and unified storage platform.

| | | |
|-------------------|--|----------|
| Unit – III | Backup, Archive and Replication | 9 |
|-------------------|--|----------|

Business continuity terminologies, planning and solutions, clustering and multipathing architecture to avoid single points of failure, Backup and recovery – methods, targets and topologies, Data duplication and backup in virtualized environment, Fixed content and data archive, Local replication in classic virtual environments, Remote replication in classic and virtual environment.

| | | |
|------------------|------------------------|----------|
| Unit – IV | Cloud Computing | 9 |
|------------------|------------------------|----------|

Business drivers for Cloud computing, Definition of Cloud computing, Characteristics of cloud computing, Steps involved in transitioning from Classic data center to Cloud computing environment services and deployment models, Cloud infrastructure components, Cloud migration considerations.

| | | |
|-----------------|---|----------|
| Unit – V | Securing and Managing Storage Infrastructure | 9 |
|-----------------|---|----------|

Security threats, and countermeasures in various domains security solutions for FC-SAN, IP-SAN and NS environments, Security in virtualized and cloud environment, Monitoring and managing various information infrastructure components in classic and virtual environments, Information lifecycle management (ILM) and storage tiering, Cloud service management activities

**20MIE11 - MODERN INFORMATION RETRIEVAL TECHNIQUES**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | DBMS, DWDM, Web Technology | 2 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|--|
| Preamble | Information Retrieval Techniques discusses about the basic concepts of IR, and various modeling techniques with different ways of indexing and searching mechanisms to build a text or multimedia based IR system. |
|----------|--|

| | | |
|-----------------|---|----------|
| Unit – I | Introduction and Classic IR Models | 9 |
|-----------------|---|----------|

: Information Retrieval - The IR Problem - The IR System - Search Interfaces Today - Visualization in Search Interfaces - Modeling – Boolean Model – Term Weighting – TF-IDF Weighting – Vector Model – Set Theoretic Models – Algebraic Models – Latent Semantic Indexing Model – Neural Network Model - Probabilistic Models - Retrieval Evaluation – Retrieval Metrics.

| | | |
|------------------|---|----------|
| Unit – II | Relevance Feedback, Languages and Query Properties | 9 |
|------------------|---|----------|

A Framework for feedback methods - Explicit Relevance feedback - Implicit feedback through local analysis - Global analysis - Documents: Metadata - Documents formats - Queries - Query Language – Query Properties.

| | | |
|-------------------|--|----------|
| Unit – III | Text Operations, Indexing and Searching | 9 |
|-------------------|--|----------|

Text Properties - Document Preprocessing - Text Compression – Text Classification – Characterization of Text Classification – Unsupervised Algorithms – Supervised Algorithms – Decision Tree – K-NN Classifier – SVM Classifier – Feature Selection or Dimensionality Reduction – Evaluation Metrics – Accuracy and Error – Indexing and Searching – Inverted Indexes – Sequential Searching – Multidimensional Indexing.

| | | |
|------------------|---------------------------------------|----------|
| Unit – IV | Web Retrieval and Web Crawling | 9 |
|------------------|---------------------------------------|----------|

The Web – Search Engine Architectures – Cluster Based Architecture – Distributed Architectures – Search Engine Ranking – User Interaction – Browsing – Web Crawling – Applications of a Web Crawler – Taxonomy – Architecture and Implementation – Scheduling Algorithms – Evaluation.

| | | |
|-----------------|---------------------|----------|
| Unit – V | Applications | 9 |
|-----------------|---------------------|----------|

Enterprise Search - Tasks - Architecture – Library Systems – Online Public Access Catalogues – IR System and Document Databases – Digital Libraries – Architecture and Fundamentals.

**20MIE12 MOBILE AND WIRELESS SECURITY**

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Computer Networks | 2 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|---|
| Preamble | The objective of this course is to have better knowledge on security issues, applications, attacks and security issues in wireless and mobile communications. |
|----------|---|

| | | |
|-----------------|---|----------|
| Unit – I | Introduction to Mobile and Wireless Networks | 9 |
|-----------------|---|----------|

Cellular Networks, 1G through 3G, IEEE Networks - WLAN IEEE 802.11, WPAN IEEE 802.15, WMAN IEEE 802.16, IEEE 802.20, MIH IEEE 802.21, WRAN IEEE 802.22, Mobile Internet Networks – Macro and Micro mobility – Personal mobility – SIP – Identity based mobility, NEMO and MANETs – Vulnerabilities in wireless communications – security basics – symmetric and asymmetric cryptography, Hash functions – Electronic signatures – MAC – PKI and electronic certificate – IPSec – AAA protocol – Firewalls – Intrusion detection.

| | | |
|------------------|-------------------------------------|----------|
| Unit – II | Wi-Fi Security Architectures | 9 |
|------------------|-------------------------------------|----------|

Hot Spot architecture – WIDS – Rogue AP detection – IEEE 802.11 geolocation techniques – Honeypots – Bluetooth Security – Protocol architecture – Radio physical layer – Device addressing – SCO and ACL logical transports – Security mode – Authentication and pairing – Attacks – BlueSmack – WiFi Security-Passive and Active attacks – DOS attacks – Trojan attack – Dictionary Attack.

| | | |
|-------------------|---------------------------------------|----------|
| Unit – III | IEEE 802.11 and WiMAX Security | 9 |
|-------------------|---------------------------------------|----------|

Security in IEEE 802.11 – WEP – WEP2 – IV collisions – RC4 weakness – 802.1x authentication - 802.11i security architecture – policy negotiation – radio security policies – RADIUS – EAP – PKI – WiMAX security – TEK – KEK – IEEE 802.16e – PKMv2-RSA – Security Association – 3 way handshake – role of smart cards in WiMAX.

| | | |
|------------------|-----------------------------------|----------|
| Unit – IV | Security in Adhoc Networks | 9 |
|------------------|-----------------------------------|----------|

Attacks to routing protocols – Security mechanisms – Auto-configuration – Key management – Self-managed PKI – Resurrecting Duckling – Group key management – Wireless Sensor Networks – Attacks – Preventive mechanisms – Intrusion tolerance – SNEP – μ TELSA – TinySec – key management in WSNs.

| | | |
|-----------------|--|----------|
| Unit – V | Security in Mobile Telecommunication Networks | 9 |
|-----------------|--|----------|

Signaling system 7 (SS7) – GSM security – GRPS security – UMTS infrastructure and security – H.323 – SIP – Megaco – VoIP security flaws and countermeasure – IMS architecture – security flaws – 4G security – Protection of interception – Security issues in Mobile IP – HIP – NetLMM.

**20MIE13 - SOCIAL NETWORK ANALYSIS**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Nil | 3 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|--|
| Preamble | The study of graphs and revelation of their properties with their tools have been termed as Social Network Analysis. Some of the surprising and beautiful discoveries achieved with Social Network Analysis are 6 degrees of separation, the algorithm behind Google search, Link prediction, Viral marketing, etc., |
|----------|--|

| | | |
|-----------------|---|----------|
| Unit – I | Graph Theory and Social Networks | 9 |
|-----------------|---|----------|

Graphs: Basic Definitions- Paths and Connectivity- Distance and Breadth First Search-Network Dataset: An overview. Strong and Weak Ties: Triadic Closure- The Strength of Weak Ties- Tie Strength and Network Structure in Large Scale Data- Tie Strength, Social Media, and Passive Engagement- Closure, Structural Holes, and Social Capital. Networks in their Surrounding Contexts: Homophily – Mechanism Underlying Homophily-Selection and Social Influence- Affiliation. Positive and Negative Relationships: Structural Balance- Characterizing the Structure of Balanced Networks – Application of Structural Balance – A Weaker Form of Structural Balance

| | | |
|------------------|--|----------|
| Unit – II | Game Theory and Interaction in Networks | 9 |
|------------------|--|----------|

Games: What is Game- Reasoning about Behavior in Game- Best Responses and Dominant Strategies- Nash Equilibrium- Multiple Equilibria- Coordination Games, The Hawk-Dove Game-Mixed Strategies-Examples and Empirical Analysis- Pareto Optimality and Social Optimality. Evolutionary Game Theory: Fitness as a Result of interaction- Evolutionarily Stable Strategies- A General Description of Evolutionarily Stable Strategies- Relationship between Evolutionarily and Nash Equilibria- Evolutionarily Stable Mixed Strategies. Modeling Network Traffic using Game Theory: Traffic at Equilibrium- Braess's Paradox. Matching Markets: Bipartite Graphs and Perfect Matchings-Valuations and Optimal Assignments.

| | | |
|-------------------|--|----------|
| Unit – III | Information Networks and the World Wide Web | 9 |
|-------------------|--|----------|

The Structure of the Web: The World Wide Web- Information Networks, Hypertext, and Associative Memory- The Web as a Directed Graph- The Bow-Tie Structure of the Web. Link Analysis and Web Search: Searching the Web: The problem of Ranking-Link Analysis using Hubs and Authorities- Page Rank- Applying Link Analysis in Modern Web Search.

| | | |
|------------------|---|----------|
| Unit – IV | Network Dynamics - Population Models | 9 |
|------------------|---|----------|

Information Cascades: Following the Crowd- A Simple Herding Experiment- Bayes Rule: A model of Decision Making-Making under Uncertainty- Baye's Rule in the Herding Experiment- A Simple, General Cascade Model- Sequential Decision Making and Cascades. Network Effects: The Economy Without Network Effects- The Economy with Network Effects- Stability, Instability and Tipping Points- A Dynamic View of the Market- Industries with Network Goods- Mixing Individual Effects with Population-Level Effects. Power Laws and Rich-Get-Richer Phenomena: Popularity as Network Phenomenon-Power Laws- Rich-Get-Richer Models-The Unpredictability of Rich-Get-Richer Model-The Long Tail-The Effect of Search Tools and Recommendation Systems.

| | | |
|-----------------|---|----------|
| Unit – V | Network Dynamics – Structural Models | 9 |
|-----------------|---|----------|

Cascading Behavior in Networks: Diffusion in Network-Modeling diffusion through a Network- Cascades and Clusters- Diffusion, Thresholds, and the Role of Weak Ties- Extensions of the Basic Cascade Model- Knowledge, Thresholds and Collective Action. The Small-World Phenomenon: Six Degrees of Separation- Structure and Randomness- Decentralized Search- Modeling the process of Decentralized Search- Empirical Analysis and Generalized Models- Core Periphery Structures and Difficulties in Decentralized Search. Epidemics: Diseases and the Networks that transmit them-Branching Processes- The SIR Epidemic Model-The SIS Epidemic Model- Synchronization- Transient Contacts and the Danger of Concurrency.

20MIE14 - DATA MINING TECHNIQUES

| | | | | | | | |
|------------------------------|---------------------------------------|-------------|-----------------|----------|----------|----------|---------------|
| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Database Management Systems | 3 | PE | 3 | 0 | 0 | 3 |

| | |
|-----------------|--|
| Preamble | This course provides students with an overview of the data mining process and techniques for preprocessing. It also make the students to gain knowledge of various data mining techniques and also prepare them for taking research in the area of data mining and its applications. |
|-----------------|--|

| | | |
|-----------------|---------------------|----------|
| Unit – I | Introduction | 9 |
|-----------------|---------------------|----------|

Data Mining-Steps in Knowledge Discovery Process- Kinds of Data and Patterns – Technologies used-Targeted applications - Major issues in Data Mining - Data objects and attribute types - Statistical descriptions of data - Data Visualization- Measuring data similarity and dissimilarity.

| | | |
|------------------|---------------------------|----------|
| Unit – II | Data Preprocessing | 9 |
|------------------|---------------------------|----------|

Data Cleaning, Integration, Reduction, Transformation and Discretization, Mining Frequent Patterns - Frequent Itemset Mining Methods.

| | | |
|-------------------|-----------------------|----------|
| Unit – III | Classification | 9 |
|-------------------|-----------------------|----------|

Decision Tree Induction-Bayesian Classification - Rule based Classification - classification by Back Propagation – Support Vector Machines – Lazy Learners – Model Evaluation and Selection - Techniques to improve Classification Accuracy - k-Nearest Neighbor Classifier.

| | | |
|------------------|--------------------------|----------|
| Unit – IV | Clusters Analysis | 9 |
|------------------|--------------------------|----------|

Partitioning Methods – Hierarchical Methods – Density based Methods - Grid based Methods - Evaluation of Clustering – Outliers and Outlier analysis - Outlier detection Methods - Statistical Approaches.

| | | |
|-----------------|---------------------|----------|
| Unit – V | Applications | 9 |
|-----------------|---------------------|----------|

Mining Complex data types - Statistical Data Mining - Data Mining foundations - Visual and Audio Data Mining – Applications - Ubiquitous and invisible Data Mining - Social impacts of Data Mining.

20MIE15 - DEEP LEARNING TECHNIQUES

| | | | | | | | |
|-------------------------------|---|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Fundamental concepts of Algorithms and computer programming | 3 | PC | 3 | 0 | 0 | 3 |

| | | | | | | | |
|--|---|--|--|--|--|--|----------|
| Preamble | Deep Learning is a subfield of machine learning concerned with algorithms inspired by the structure and function of the brain called artificial neural networks. This course explores the fundamentals concepts in the design of deep neural networks and its various architectures such as convolutional neural networks, recurrent neural networks etc. | | | | | | |
| Unit – I | Foundations of Deep Learning | | | | | | 9 |
| Introduction – Math behind machine learning – Linear Algebra – Statistics – How does Machine Learning works – Logistic regression – Evaluating Models – Neural Networks – Training Neural Networks – Activation functions – Loss functions – Hyper parameters. | | | | | | | |
| Unit- II | Architectural Design | | | | | | |
| Defining Deep Learning – Common Architectural Principles of Deep Networks: Parameters – Layers - Activation functions - Loss functions - Optimization Algorithms – Hyper parameters. Building blocks of Deep Networks: RBMS-Auto encoders-Variational encoders. | | | | | | | |
| Unit - III | Types of Deep Networks | | | | | | 9 |
| Unsupervised pretrained Networks – Convolutional Neural Networks (CNNs) – Recurrent Neural Networks – Recursive Neural Networks – Applications. | | | | | | | |
| Unit - IV | Convolutional Neural Networks | | | | | | 9 |
| Pooling layers – Batch Normalization – padding and strides – Different types of initialization – implementing a convolutional auto encoder - 1D to CNN to text. Recurrent Neural Networks: Implementing a simple RNN – Adding LSTM – GRUs – Bidirectional RNNs – Character-level text generation. | | | | | | | |
| Unit - V | Case Studies | | | | | | 9 |
| Large scale deep learning – Computer vision – speech recognition – natural language processing – implementation. | | | | | | | |

**20MIE16 - MOBILE AND PERVASIVE COMPUTING**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|---------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Network design and Technologies | 3 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|--|
| Preamble | This course provides an understanding of wireless and mobile communication concepts through various layers of mobile networking. It also helps to realize the pervasive and context aware computing architectures, systems and applications. |
|----------|--|

| | |
|---|---|
| Unit – I | Introduction to Wireless Environment |
| Introduction to wireless communication-Wireless Transmission- Medium Access Control- Wireless MAC protocols –Comparison of 2G, 3G,4G looking ahead 5G systems | |

| | |
|--|-----------------------------|
| Unit - II | Mobile Communication |
| GSM - Bluetooth - Mobile network layer-Mobile transport layer - File system support for mobility support - Mobile execution environments and applications. | |

| | |
|--|--------------------------------|
| Unit - III | Pervasive Communication |
| Pervasive computing principles - Characteristics of pervasive computing environments - Applications and case study - Pervasive Web Application architecture - Pervasive computing and web based applications - Voice enabling pervasive computing- PDA in pervasive computing- User interface issues in pervasive computing. | |

| | |
|---|--------------------------------|
| Unit - IV | Context Aware Computing |
| Structure and Elements of Context-aware Pervasive Systems: Abstract architecture – Infrastructures - Middleware and toolkits, Context-aware mobile services: Context for mobile device users – Location-based services- Ambient service- Enhancing Context-aware mobile services and Context aware artifacts. | |

| | |
|--|---------------------------------------|
| Unit - V | Context-Aware Pervasive System |
| Context-aware sensor networks – A framework for Context aware sensors – Context-aware security systems – Constructing Context-aware pervasive system- Future of Content aware systems. | |

**20MIE17 - WEB ANALYTICS AND DEVELOPMENT**

| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|--------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Nil | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|--|--|--|--|--|--|--|
| Preamble | Explore the role of web data and analysis tools to perform web analysis to make efficient web search as well as for information retrieval. | | | | | | |
|----------|--|--|--|--|--|--|--|

| | | |
|-----------------|----------------------|----------|
| Unit – I | Web Analytics | 9 |
|-----------------|----------------------|----------|

Introduction to Social media and network - Social Media: New Technologies of Collaboration - Social Network Analysis Measuring - Mapping - Modeling Collections of Connections - Search Engine Optimization.

| | | |
|------------------|---------------|----------|
| Unit - II | NodeXL | 9 |
|------------------|---------------|----------|

Getting Started with NodeXL - Layout - Visual Design - Labeling - Calculating and Visualizing Network – Metrics.

| | | |
|-------------------|--------------------------------------|----------|
| Unit - III | Social Media Network Analysis | 9 |
|-------------------|--------------------------------------|----------|

Email - Twitter: Nuts and Bolts - Networks - Acquiring Data - Discovery - Visualizing and Interpreting - Facebook - YouTube - Wiki Networks.

| | | |
|------------------|--------------------------|----------|
| Unit - IV | Web Analytics 2.0 | 9 |
|------------------|--------------------------|----------|

Introduction - Optimal Strategy: Steps to Predetermining Your Future Success - Click streamanalysis: Introduction- Metrics - Practical Solutions.

| | | |
|-----------------|--|----------|
| Unit - V | Competitive Intelligence Analysis | 9 |
|-----------------|--|----------|

CI Data Sources, Types, and Secrets - Website Traffic Analysis-Search and Keyword Analysis - Audience Identification and Segmentation Analysis - Emerging Analytics: Analyzing Offline Customer Experiences - Measuring the Success of Blogs - Optimal Solutions for Hidden Web Analytics.

20MIE18 -DIGITAL IMAGE PROCESSING AND COMPUTER VISION

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Digital Signal Processing | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|---|--|--|--|--|--|--|
| Preamble | To analyze the images in frequency domain and to perform various operations like enhancement, Restoration, Compression, Registration and Multi resolution analysis. | | | | | | |
|----------|---|--|--|--|--|--|--|

| | | |
|-----------------|-------------------------|----------|
| Unit – I | Image Transforms | 9 |
|-----------------|-------------------------|----------|

Orthogonal transforms – FT, DST, DCT, Hartley, Walsh hadamard, Haar, Radon, Slant Wavelet, KL, SVD and their properties.

| | | |
|------------------|--|----------|
| Unit - II | Image Enhancement and Restoration | 9 |
|------------------|--|----------|

Image enhancement - Point operations - contrast stretching - clipping and thresholding - digital negative intensity level slicing - bit extraction. Histogram processing - histogram equalisation -modification. Spatial operations – smoothing spatial filters, sharpening spatial filters. Transform operations. Color image enhancement. Image Restoration – degradation model, Noise models, Unconstrained and Constrained restoration, Inverse filtering – removal of blur caused by uniform linear motion, Wiener filtering, Restoration by SVD and Homomorphic filtering

| | | |
|-------------------|--------------------------|----------|
| Unit - III | Image Compression | 9 |
|-------------------|--------------------------|----------|

Image Compression – Need for data compression – Run length encoding – Huffman coding – Arithmetic coding – predictive coding- transform based compression, - vector quantization – block truncation coding. Image Segmentation: Point, Edge and line detection -thresholding-Region based approach Image Representation: boundary based – region based and intensity based description

| | | |
|------------------|--|----------|
| Unit - IV | Registration and Multivalued Image Processing | 9 |
|------------------|--|----------|

Registration – geometric transformation – registration by mutual information Multivalued image processing – colour image processing – colour image enhancement- satellite image processing- radiometric correction – other errors- multi spectral image enhancement- medical image processing – image fusion.

| | | |
|-----------------|--|----------|
| Unit - V | Wavelets and Multiresolution Processing | 9 |
|-----------------|--|----------|

Image Pyramids – Subband coding – The Haar Transform – Multiresolution Expansion – Series Expansion – Scaling Function – Wavelet Function – Wavelet Transform in One Dimension- The Wavelet Series Expansion – The Discrete Wavelet Transform – The Continuous Wavelet Transform – The Fast Wavelet Transform – Wavelet transform in two dimensions– Applications in image denoising and compression.

20MIE19 -ADVANCED PARALLEL ARCHITECTURE AND PROGRAMMING

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Computer Architecture, C Programming | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|---|--|--|--|--|--|--|----------|
| Preamble | Provide principles of GPU computer architecture with programming environments and architectural aspects of modern GPUs, with a special focus on their streaming parallel nature, writing programs on the GPU using high level languages like CUDA. | | | | | | |
| Unit – I | Introduction | | | | | | 9 |
| Overview of supercomputing - Understanding parallelism with GPUs - CUDA hardware overview- Setting up CUDA | | | | | | | |
| Unit - II | Memory handling with CUDA | | | | | | 9 |
| Introduction – caches - shared memory - Constant memory - Global memory - Texture Memory | | | | | | | |
| Unit - III | CUDA in Practice | | | | | | 9 |
| Introduction -Serial and Parallel code - Processing datasets – Profiling - An example using AES - Multi-CPU and Multi-GPU solutions | | | | | | | |
| Unit - IV | Optimizing Application | | | | | | 9 |
| Parallel/Serial GPU/CPU - Memory considerations –Transfers - Thread usage - Calculations and Divergence – Algorithms | | | | | | | |
| Unit - V | Designing GPU-Based Systems | | | | | | 9 |
| Introduction - CPU Processor - GPU Device - Mass storage - Power Consideration | | | | | | | |

**20MIE20 - NATURE INSPIRED OPTIMIZATION TECHNIQUES**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Linear algebra and Calculus | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|---|--|--|--|--|--|--|
| Preamble | This course helps the learners to understand the algorithms that are inspired by naturally occurring phenomena. The focus is on abstracting nature inspired techniques which influence computing. | | | | | | |
|----------|---|--|--|--|--|--|--|

| | | |
|-----------------|-----------------------------------|----------|
| Unit – I | Introduction to Algorithms | 9 |
|-----------------|-----------------------------------|----------|

Newton’s Method – Optimization - Search for Optimality - No-Free-Lunch Theorems - Nature-Inspired Metaheuristics - Brief History of Metaheuristics. **Analysis of Algorithms:** Introduction - Analysis of Optimization Algorithms - Nature-Inspired Algorithms - Parameter Tuning and Parameter Control.

| | | |
|------------------|----------------------------|----------|
| Unit - II | Simulated Annealing | 9 |
|------------------|----------------------------|----------|

Annealing and Boltzmann Distribution - Parameters - SA Algorithm - Unconstrained Optimization - Basic Convergence Properties - SA Behavior in Practice - Stochastic Tunneling. **Genetic Algorithms** : Introduction - Genetic Algorithms - Role of Genetic Operators - Choice of Parameters - GA Variants - Schema Theorem - Convergence Analysis.

| | | |
|-------------------|------------------------------------|----------|
| Unit - III | Particle Swarm Optimization | 9 |
|-------------------|------------------------------------|----------|

Swarm Intelligence - PSO Algorithm - Accelerated PSO – Implementation - Convergence Analysis - Binary PSO. **Cat Swarm Optimization:** Natural Process of the Cat Swarm - Optimization Algorithm – Flowchart - Performance of the CSO Algorithm.

| | | |
|------------------|-----------------------|----------|
| Unit - IV | TLBO Algorithm | 9 |
|------------------|-----------------------|----------|

Introduction - Mapping a Classroom into the Teaching-Learning-Based optimization – Flowchart. **Cuckoo Search:** Cuckoo Life Style - Details of COA – flowchart - Cuckoos’ Initial Residence Locations - Cuckoos’ Egg Laying Approach - Cuckoos Immigration - Capabilities of COA. **Bat Algorithms:** Echolocation of Bats - Bat Algorithms – Implementation - Binary Bat Algorithms - Variants of the Bat Algorithm - Convergence Analysis.

| | | |
|-----------------|-------------------------|----------|
| Unit - V | Other Algorithms | 9 |
|-----------------|-------------------------|----------|

Ant Algorithms - Bee-Inspired Algorithms - Harmony Search - Hybrid Algorithms.

**20MIE21 -REINFORCEMENT LEARNING**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|--------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Machine Learning | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|----------|---|--|--|--|--|--|--|
| Preamble | This course will provide a solid introduction to the field of reinforcement learning and explore the core challenges and approaches, including generalization and exploration with reinforcement learning algorithms. | | | | | | |
|----------|---|--|--|--|--|--|--|

| | | |
|-----------------|---------------------|----------|
| Unit – I | Introduction | 9 |
|-----------------|---------------------|----------|

Reinforcement Learning – Examples-Elements of Reinforcement Learning – Limitations and Scope – **Multi –armed Bandits** : A k-armed Bandit Problem - Action-value Methods - The 10-armed Testbed - Incremental Implementation - Tracking a Non-stationary Problem - Optimistic Initial Values - Gradient Bandit Algorithms

| | | |
|------------------|---|----------|
| Unit - II | Finite Markov Decision processes | 9 |
|------------------|---|----------|

The Agent – Environment Interface - Goals and Rewards - Returns and Episodes - Unified Notation for Episodic and Continuing Tasks - Policies and Value Functions - **Dynamic programming**: Policy Evaluation (Prediction) - Policy Improvement - Policy Iteration - Value Iteration -Asynchronous Dynamic Programming - Generalized Policy Iteration

| | | |
|-------------------|----------------------------|----------|
| Unit - III | Monte carlo methods | 9 |
|-------------------|----------------------------|----------|

Monte Carlo Prediction - Monte Carlo Estimation of Action Values - Monte Carlo Control - Monte Carlo Control without Exploring Starts - Off-policy Prediction via Importance Sampling -Incremental Implementation - Off-policy Monte Carlo Control - **Temporal Difference Learning**: TD Prediction - Advantages of TD Prediction Methods - Optimality of TD(0) - Sarsa: On-policy TD Control - Q-learning: Off-policy TD Control

| | | |
|------------------|-----------------------------|----------|
| Unit - IV | n-step Bootstrapping | 9 |
|------------------|-----------------------------|----------|

n-step Sarsa - n-step Off-policy Learning - n-step Tree Backup Algorithm - **Planning and Learning with Tabular Methods** : Models and Planning – Dyna - Integrated Planning, Acting, and Learning - Prioritized Sweeping - Expected vs. Sample Updates - Trajectory Sampling - Real-time Dynamic Programming - Planning at Decision Time - Heuristic Search - Rollout Algorithms - Monte Carlo Tree Search

| | | |
|-----------------|--|----------|
| Unit - V | On-policy Prediction with Approximation | 9 |
|-----------------|--|----------|

Value-function Approximation - The Prediction Objective (VE) - Stochastic-gradient and Semi-gradient Methods - Linear Methods - Feature Construction for Linear Methods -Selecting Step - Size Parameters Manually - On-policy Control with Approximation: Episodic Semi-gradient Control - Semi-gradient n-step Sarsa - Average Reward: A New Problem Setting for Continuing Tasks - Policy Gradient Methods

20MIE22 - SOFTWARE DEFINED NETWORKING

| | | | | | | | |
|-------------------------------|--|-------------|-----------------|----------|----------|----------|---------------|
| Programme & Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
| Prerequisites | Operating Systems, Data Structures and Algorithms, Computer Networks | 4 | PE | 3 | 0 | 0 | 3 |

| | | | | | | | |
|--|--|--|--|--|--|--|----------|
| Preamble | Provides insight on basics of software defined networking and how it is changing the way communications networks are managed, maintained, and secured. | | | | | | |
| Unit – I | Introduction to SDN | | | | | | 9 |
| Traditional switch Architecture, Autonomous and Dynamic Forwarding Table, Why SDN?, The Genesis of SDN, How SDN works, The OpenFlow Specification , OpenFlow 1.0 and OpenFlow Basics, OpenFlow 1.1 and OpenFlow 1.3 | | | | | | | |
| Unit - II | SDN application in Data Center | | | | | | 9 |
| SDN in the Data Center, SDN Use Cases in the Data Center, Open SDN versus Overlays in the Data Center, SDN in other Environments, SDN Applications, SDN Open Source, Switch Implementation, Controller Implementation, SDN Futures | | | | | | | |
| Unit - III | SDN control plane | | | | | | 9 |
| Distributed Control plane, Centralized Control plane, OpenFlow, SDN Controllers, Network Programmability, Data Center concepts and constructs, The Virtualized Multitenant Data Center, SDN solution for Data Center Network | | | | | | | |
| Unit - IV | SDN and NFV | | | | | | 9 |
| Network Function Virtualization, Virtualization and Data plane I/O, Service Locations and Chaining, Network Topology and Topological Information Abstraction, Building an SDN Framework, IETF SDN Frameworks, Open Daylight Controller/Framework | | | | | | | |
| Unit - V | SDN use cases | | | | | | 9 |
| Use cases for Bandwidth Scheduling, Manipulation and calendaring, Data Center Overlays, Big Data and Network Function Virtualization, Input Traffic Monitoring, Classification, and Triggered Actions. | | | | | | | |

**20MIE23 - QUANTUM INFORMATION AND QUANTUM COMPUTING**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|-------------------|---------------------------------------|------|----------|---|---|---|--------|
| Prerequisites | Linear Algebra, Theory of Computation | 4 | PE | 3 | 0 | 0 | 3 |

| | |
|----------|---|
| Preamble | Provide an insight of basic of quantum physics from a computer scientist's perspective, and how it describes reality and understand the philosophical implications of quantum computing |
|----------|---|

| | | |
|-----------------|---------------------------------|----------|
| Unit – I | Qubit and Quantum States | 9 |
|-----------------|---------------------------------|----------|

The Qubit- Vector Spaces - Linear Combination Of Vectors - Uniqueness of a spanning set - basis & dimensions - inner Products – orthonormality - gram-schmidt orthogonalization - bra-ket formalism - the Cauchy-schwarz and triangle Inequalities.

| | | |
|------------------|-------------------------------|----------|
| Unit - II | Matrices and Operators | 9 |
|------------------|-------------------------------|----------|

Observables - The Pauli Operators - Outer Products - The Closure Relation - Representation of operators using matrices - outer products & matrix representation - matrix representation of operators in two dimensional spaces - Pauli Matrix - Hermitian unitary and normal operator - Eigen values and Eigen Vectors - Spectral Decomposition - Trace of an operator – important properties of Trace - Expectation Value of Operator - Projection Operator - Positive Operators.

| | | |
|-------------------|------------------------|----------|
| Unit - III | Tensor Products | 9 |
|-------------------|------------------------|----------|

Representing Composite States in Quantum Mechanics - Computing inner products - Tensor products of column vectors - operators and tensor products of Matrices.

| | | |
|------------------|-------------------------|----------|
| Unit - IV | Density Operator | 9 |
|------------------|-------------------------|----------|

Density Operator of Pure and Mix state - Key Properties - Characterizing Mixed State - Practical Trace and Reduce Density Operator - Density Operator and Bloch Vector.

| | | |
|-----------------|-----------------------------------|----------|
| Unit - V | Quantum Measurement Theory | 9 |
|-----------------|-----------------------------------|----------|

Distinguishing Quantum states and Measures - Projective Measurements - Measurement on Composite systems - Generalized Measurements - Positive Operator-Valued Measures.

| COURSE OUTCOMES: On completion of the course, the students will be able to | | BT Mapped (Highest Level) |
|--|--|--------------------------------------|
| CO1: | explain qubit and quantum states | Understanding (K2) |
| CO2: | identify various operation that can be done using operators and matrices | Understanding (K2) |
| CO3: | apply Tensor product and density operator to various operation | Applying (K3) |
| CO4: | implement the principles of density operator for solving problems | Applying (K3) |
| CO5: | summarize quantum measurement theory | Understanding (K2) |

| Mapping of COs with POs and PSOs | | | | | | |
|---|------------|------------|------------|------------|------------|------------|
| COs/POs | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 |
| CO1 | 1 | | 3 | 2 | | 2 |
| CO2 | 1 | 2 | 2 | | 1 | 3 |
| CO3 | 2 | | 3 | 1 | 2 | 2 |
| CO4 | 2 | 1 | 3 | | 2 | 2 |
| CO5 | 1 | | 3 | | 2 | |
| 1 – Slight, 2 – Moderate, 3 – Substantial, BT- Bloom’s Taxonomy | | | | | | |

| ASSESSMENT PATTERN - THEORY | | | | | | | |
|------------------------------------|---------------------------|-----------------------------|------------------------|-------------------------|--------------------------|------------------------|----------------|
| Test / Bloom’s Category* | Remembering (K1) % | Understanding (K2) % | Applying (K3) % | Analyzing (K4) % | Evaluating (K5) % | Creating (K6) % | Total % |
| CAT 1 | 50 | 50 | | | | | 100 |
| CAT 2 | 35 | 35 | 30 | | | | 100 |
| CAT 3 | 30 | 30 | 40 | | | | 100 |
| ESE | 30 | 30 | 40 | | | | 100 |

**20MIE24 -KNOWLEDGE REPRESENTATION AND REASONING**

| Programme& Branch | M.TECH. Information Technology | Sem. | Category | L | T | P | Credit |
|----------------------|---|----------|-----------|----------|----------|----------|----------|
| Prerequisites | Discrete Mathematics, Artificial Intelligence | 4 | PE | 3 | 0 | 0 | 3 |

| | |
|-----------------|--|
| Preamble | A comprehensive understanding of Artificial Intelligence and build intelligent behavior to show how this knowledge can be represented symbolically, and how automated reasoning procedures can make Intelligent Systems in the context of Knowledge Engineering. |
|-----------------|--|

| | | |
|-----------------|---------------------|----------|
| Unit – I | Introduction | 9 |
|-----------------|---------------------|----------|

Intelligent Agents - Problem Solving - Solving Problems by Searching - Beyond Classical Search - Adversarial Search - Constraint Satisfaction Problems.

| | | |
|------------------|--------------------------------|----------|
| Unit - II | Knowledge and Reasoning | 9 |
|------------------|--------------------------------|----------|

Logical Agents - First Order Logic - Inference in First Order Logic - Knowledge Representation.

| | | |
|-------------------|--|----------|
| Unit - III | Uncertain Knowledge and Reasoning | 9 |
|-------------------|--|----------|

Quantifying Uncertainty-Probabilistic Reasoning - Probabilistic Reasoning over Time - Making Simple Decisions -Making Complex Decisions.

| | | |
|------------------|---------------------------------------|----------|
| Unit - IV | Object Oriented Representation | 9 |
|------------------|---------------------------------------|----------|

Object-Oriented Representation - Frame Formalism - Structured Descriptions - Meaning and Entailment - Taxonomies and Classification - Inheritance

| | | |
|-----------------|-----------------------------|----------|
| Unit - V | Actions and Planning | 9 |
|-----------------|-----------------------------|----------|

Actions - The Situation Calculus - Frame Problem - Complex Actions - Planning - The STRIPS Representation - Planning as a Reasoning Task - Hierarchical and Conditional Planning
